Kidprint ID is a free, online service that allows parents to create a digital footprint for their children. This footprint includes information such as their child's name, date of birth, and contact information. Parents can also upload photos and videos of their children. The footprint is then used to identify and locate their children in case of an emergency. Kidprint ID is a valuable tool for parents who want to ensure their children's safety.

Parents can also use Kidprint ID to track their children's location in real-time. This is done by installing the Kidprint ID app on their child's smartphone. The app will send parents notifications when their child is in a new location. This is a great way for parents to keep track of their children's whereabouts and ensure their safety.
